

TRUST IN MANUFACTURING SINCE 1999.

ONUR FITTINGS & PLASTIC PIPES is a premium PPRC pipe and fittings manufacturer based in İstanbul, Türkiye, founded in 1999 by Dr. Adnan Akay and currently led by second-generation owner Akın Akay under the brand "ONUR PLASTİK." We provide a 50-year warranty on our products.

Since our establishment, we have continued to deliver safe, high-quality, and hygienic water distribution systems to end users.

TRUST IS NOT A PROMISE; IT IS A DISCIPLINE REPRODUCED EVERY DAY.

Our field of activity is the manufacturing of pipes and fittings for plumbing and infrastructure applications.

We Are Building the Future Together

Our Vision

In a world where every drop of clean water matters, to become the global reference point for safe water conveyance systems.

Our Mission

With every product we manufacture, we protect families' health, contractors' reputations, and the future of our communities. Trust is not a promise to us; it is a discipline reproduced every day.

Our Values

01

Trust — The Cornerstone

Our word comes before any contract. Our behavior is tested as much as our products. Trust is our most valuable raw material—once it's lost, it cannot be manufactured again.

03

Transparency

We don't hide—we manage. From numbers to processes, everything is visible. There are no hidden agendas inside, and we leave no grey areas outside. Our goal of going public is the ultimate proof of our commitment to transparency.

05

Responsibility for the Future

We manufacture today with tomorrow's world in mind. From energy to waste, from packaging to logistics, we aim to leave as little trace as possible in every decision we make.

07

Operational Discipline

Standards are not suggestions—they are non-negotiable. We choose the right way, not shortcuts. Undisciplined production leads to unsafe products.

09

Team Intelligence

We build championship teams, not star players. We don't hoard knowledge—we share it. We elevate one another. Ego stays at the door; only "we" enters.

11

Legacy & Continuity

We protect the founder's effort and scale it as the second generation. The foundation Dr. Adnan Akay laid in 1999 is our compass. We draw strength from the past and invest in the future.

02

Consistency in Quality

Whatever the first batch is, the thousandth batch is the same. Quality should never be a surprise—and we never allow it to be. Our can place orders with complete confidence; we manufacture with full attention and discipline. That's why we provide a **50-year warranty** on our products.

04

Ownership

We don't make excuses—we deliver solutions. In success we say "we," in mistakes we say "I." Each of us thinks and acts like an owner of Onur Plastik.

06

End-User Mindset

At the end of every pipe, there is a family. We act as if the water flowing from the tap will be consumed by our own child. Our product may be invisible—but our responsibility is not.

08

Continuous Improvement

The day you say "done" is the day decline begins. We never say "good enough." From machinery to management, from production to communication, we continuously improve everything we do.

10

Speed & Agility

We move not to report problems, but to solve them. Problems that wait grow—ours shrink. Decision-making takes courage, and we act with courage.

12

Ethical Backbone

We don't do work that is profitable but wrong. Winning in the long run means being willing to lose in the short term. In our business relationships, honesty is never up for negotiation.

Join us in elevating Onur Plastik's corporate standards and growing value creation together with our stakeholders.

We Are Building the Future Together

1999: Foundation & Vision

Founded by Dr. Adnan Akay, Onur Plastik entered the industry as a premium manufacturer of PPRC pipes and fittings. Since 2000, we have produced our own molds, achieving fully independent manufacturing capability.

Today, we offer a broad product range with **175 molds** and **325 product types**.

With solar power supporting sustainable production—alongside consistent quality and fast supply—we uphold the highest standards.

Today: Second-Generation Leadership

Under the leadership of Akın Akay, we are advancing toward our IPO goal through our corporate transformation program.

With solar power supporting sustainable production—alongside consistent quality and fast supply—we uphold the highest standards.

Our energy generation facility was established to minimize our carbon footprint and produces **1 megawatt of uninterrupted power** across a **36-decare** site.

Our Factory & Offices

Our facilities cover a total area of **13,000 m²**, including:

- **5,000 m²** production area
- **7,000 m²** outdoor area
- **1,000 m²** total office space

We are located in

Velimeşe Organized Industrial Zone (OIZ), Ergene/Tekirdağ.

We also have:

- a **sales office** in **Avcılar, Istanbul**
- a **logistics office** in **Sefaköy, Istanbul**
